The Liveliness of mind, Curiosity, and Dedication to a lifelong learning.

Data Science and Analytics Technology stack:

- Python and data related libraries: Pandas, NumPy, Sklearn, Seaborn
- SQL (working with IBM DB2 on cloud, PostgreSQL)
- IBM Watson, Microsoft Azure (in progress)
- Version control tools GIT (GitHub);
- IDEs (Visual Studio, PyCharm),
- Jupyter Notebook (Google Colabs, Kaggle);

Windows OS, Linux (Ubuntu)
MS Office, Adobe Creative Suite
HTML5, CSS3, Wordpress CRM

Knowledge:

- Understanding and making clear use of the Data Science Methodology from Business Understanding to Model Evaluation and Deployment.
- Use of Descriptive statistics and visualization techniques for understanding data content, assess data quality and discover initial insights.
- Understanding of the methods of cleaning, transforming, normalizing data and practical skills of their application in model development;
- Understanding and experience in the application of Machine Learning algorithms and methods (regression, clustering, decision trees).

Professional Certificates

IBM Data Science Professional Certificate (may 2020)
Applied Data Science Specialization (may 2020)
Google IT Support Professional Certificate (june 2020)

Education

Ivan Franko National University of Lviv
Applied Mathematics.

About

Data. I really like collecting data, researching and comparing options, looking for a way out of situations, and solving problems, and I can say with confidence that I have a knack for such work. For now, I plan to focus on Data Analytics and Forecasting (ML). I am very interested in development in this direction.

Personal. I have developed skills to search and process a large number of different types of data for a short time interval. Being a versatile person, I would rather expand the range of knowledge than deepen it. I gained most of my experience without proper academic education, doing self-education, and learning from my own experience.

Domain. I have a lot of experience (10+ years) in the real estate and retail market domain, I understand the data, technology, and nuances of the business. From design issues to the formation of investment real estate portfolio. Continuing to work in this or a related field would be the best and most effective option.

Soft Skills

Strong strategic, analytical, and critical thinking skills that lead to quality decision making.
Ability to break down complex problems and formulate plans.
Proficient storytelling, presentation, and public speaking skills.

Language

Ukrainian (Native), Russian (Second Native)
English (Intermediate, B2),
Polish(Intermediate, B1)
